

DEPARTMENT OF THE NAVY

OFFICER IN CHARGE OF NAVFAC CONTRACTS
8851 OCEAN DRIVE SUITE 139
CORPUS CHRISTI TX 78419-5226

IN REPLY REFER TO:

Bath & Associates, Inc.
5656 So. Staples, Ste. 110
Corpus Christi, Tx. 78411

Gentlemen:

This letter is issued to express our thanks for the performance of your firm on the completion of project designs in a timely manner. The continued effort during research and documentation of the required scopes is appreciated. Completeness of these packages allows NAS Corpus Christi to obtain competitive proposals for construction contracts. Capital and repair funds as well as manpower resources at this facility are limited. This places additional responsibilities on all parties to clearly describe the scope so that quality work can be delivered on schedule and within budget. The training and coordination provided by the Bath organization is to be commended.

Two of the projects recently constructed demonstrate the follow up effort and support provided in order to deliver a complete and operable facility. The professional manner in which the Bath organization performed to resolve technical questions during construction is typical of the Bath firm.

Public Works Engineering would like to express it's appreciation for past performance and looks forward to continued outstanding work in the future. Best wishes to the organization during this festive season.

Sincerely,

A handwritten signature in cursive script, appearing to read "T. Abeyta", is written over the typed name.

T. Abeyta

Director of Engineering

By direction of the

Officer in Charge of NAVFAC Contracts
