Subject: Project on Stanton and Festival

My husband and I want to thank you for the attention to the detail and environment you took when constructing the water facility below our house. It is a beautiful structure and very complementary to the mountain. Even though we would love to have the mountain stay as it is, it is nice to know there are companies today who take time to think of the surroundings when building is necessary. It has been a long time to wake up to the sound of machinery, but the last 14 (?) months haven't been as bad as we thought it would be.

Thank you for your consideration of the neighborhood.

Phyllis and Pete Davis
