Subject: Kudo to Bath Engineering

Hi Phil,

Today, after a prebid meeting, Evan Anderson took me aside to say that Bath Engineering has been extremely proactive in ensuring the success of the Festival II Pump Station and Reservoir project. The result is that Bradbury Stamm is ahead of schedule and everything is running smoothly.

I wanted to pass this "kudo" on to you and to personally say thank you for the high quality you always bring to the work you do for this Utility.
